

# DEFENDER

## MEC DEFENDER SERIES

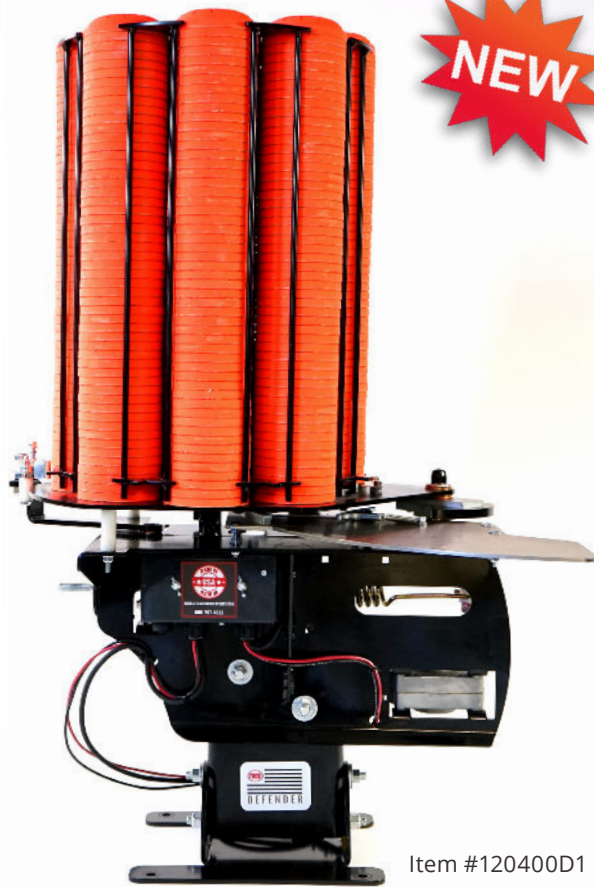

### INTRODUCING THE MEC DEFENDER

Our goal was simple. Create a machine capable of doing what the higher price machines can do, but for a fraction of the cost, all while utilizing American Made steel, components, and the American workforce to assemble these great machines. Why wouldn't we want to supply you with a machine that will DEFEND our shooting heritage?

How did we do this? INNOVATION BY DESIGN. We took our top-notch engineers, combined with our metal fab expertise, utilized our state-of-the-art metal fab equipment and created a new machine that will throw great targets, be easy on your back, easy on the check book and all done right here in the heartland of America.

MEC has set the bar high with this new machine. We listened to our customers and what the market has demanded. We went to the drawing board and engineered a new machine at an ECONOMICAL price to help you DEFEND your club for the future.
